We started the course by looking at different definitions of Sharia and Islamic law. With the help of Rumee Ahmed and Tazeen Ali, we found that the word sharia is a word that represents, at its most basic level, a moral universe or different Muslim values, ideals, and hopes. Islamic law, by contrast, can be understood as a human, fallible, and changing attempt to capture some of those ideals and apply them in the human world.

Well done!
